

HOW TO MEASURE FOR THE RIGHT SIZE DOOR:

If your current garage door has a good fit, then measure it's width & height and order the new door the same size. If this is not the case, please use the following steps to determine which size garage door you should buy.

(Measure your opening and fill in dimensions.)

- STEP 1 - A. Door opening Width _____ Ft _____ In
- STEP 2 - B. Door opening Height _____ Ft _____ In
- STEP 3 - C. *Headroom (minimum 11") _____ Ft _____ In
- STEP 4 - D. Sideroom - Left side _____ Ft _____ In
- Sideroom - Right side _____ Ft _____ In
(minimum 4" each side)

If you plan to have an electric door opener installed, the headroom required increases approximately 3" depending on the opener manufacturer.
